October 16, 2020

Mr. John Tuggle, Executive Director
Region 4 Planning and Development Council
885 Broad Street, Suite 100
Summersville, WV 26651

RE: EPA Brownfields Assessment Grant Proposal
FY21 U.S. EPA Brownfields Assessment Grant Application
EPA-OLEM-OBLR-20-06

Dear Mr. Tuggle,

Thank you for your efforts to further enhance the state's environment, economy, and quality of life by applying for a U.S. EPA Brownfields Assessment Grant.

Greenbrier and Pocahontas Counties have significant economic potential with the region's flourishing recreation tourism industry; however, the brownfield properties scattered throughout the Greenbrier and Meadow River watershed areas present a challenge to redevelopment. By inventorying properties with perceived contamination, assessing strategically located properties, and planning for reuse through community engagement, the Region 4 Planning and Development Council and its partners will eliminate barriers to redevelopment for the two identified priority industries in the area, value-added wood products and recreation tourism. The Brownfields Assessment Grant will provide vital funding to conduct these activities and ensure continued development, investment, revitalization, and success in the region.

As you prepare your application for this funding, the WVDEP Office of Environmental Remediation is in full support of your efforts. We are committed to assisting you assess, remediate, and redevelop vacant, underutilized, and contaminated properties throughout the Greenbrier and Meadow River watershed areas into productive and positive new uses. Please do not hesitate to contact me with any questions or needs.

Sincerely,

Casey E. Korbini
Deputy Director for Remediation Programs

1. PROJECT AREA DESCRIPTION AND PLANS FOR REVITALIZATION

a. Target Area and Brownfields

i. Background and Description of Target Area: Located in the rugged Appalachian Mountains within the adjacent Greenbrier and Meadow River watersheds in West Virginia, small rural communities and towns developed in the 1800's to harvest the vast virgin timber and bituminous coal resources available throughout the region. Timber was sawn and transported to growing eastern seaboard cities for home and building construction, and coal fueled the steel mills and industrial businesses of the industrial revolution. As timber and coal demands increased, more workers with their families came to this part of southeastern WV to find employment. Small communities and towns sprang up along the Greenbrier and Meadow Rivers, with population increases at times doubling within a single year during the late-1800's. River towns including Alderson, Ronceverte, Marlinton, and Rainelle were bustling with commerce, with multiple smaller timber and coal camp communities scattered throughout the area. The C&O (now CSX) Railroad completed east coast to mid-west rail lines through the area in the late-1800's, connecting this region to additional population centers and increasing timber and coal markets. By the early 1900's, this region had grown to become one of the largest producers of both bituminous coal and hardwood timber in the world.

Employment in the timber and coal industries peaked in the early to mid-1900's, then began sharply dropping. Since the 1950's, competition from other timber resources in the U.S. and other countries, combined with automation and more efficient extraction methods for coal mining, decreased job demand. Job demand continued to decrease during the last half of the 20th Century, as virgin timber resources were depleted and other energy resources like natural gas and renewable energy became more mainstream. U.S. Department of Labor data indicates the number of timber extraction and coal mining jobs are now over 85% less than their peak during the early to mid-1900's. As timber and coal shipments by rail decreased, railroad operations and subsequent jobs decreased as well. Since 2010, coal production in the area has all but ceased.

With the loss of employment in these three industries, the rural towns and communities in the Greenbrier and Meadow River watersheds have experienced extensive population loss. Examples include Marlinton, losing 39.6% of its population between 1950 and 2017, Alderson, losing 22.6% of its population between 1940 and 2017, and Rainelle, losing 25.3% of its population between 1980 and 2017 (data from U.S. Census). As timber, coal and railroad industries declined, support businesses and services in the region also declined, resulting in abandoned sawmills, closed foundries that made parts for mining and railroad equipment, and boarded up retail stores and school buildings as local populations decreased. Today, no towns in the target area have populations larger than 3,000.

After decades of decline, the Greenbrier and Meadow River watershed area is now working to reverse these trends by diversifying and growing the economy based on three primary industries: value-added wood products, recreation-based tourism and outdoor recreation equipment suppliers/manufacturers. Secondary growth timber removal using sustainable harvesting methods remains a vital jobs sector in the region, with more than half of harvested hardwood timber in Appalachia going to overseas markets for processing. Due primarily to recent tariffs, shipments of timber overseas have fallen 26% in six months (October 2018 through March 2019, data from American Hardwood Export Council) and has continued to decrease. Using sustainable "home-grown" timber to produce value-added wood products will result in new manufacturing industries and associated jobs locating in the area. Examples of value-added wood products currently being developed include Cross-Laminated Timber (CLT) products for the construction industry, and lump charcoal production utilizing state-of-the-art low-pollution technologies. CLT products are a fast-growing segment of the residential and commercial building industry worldwide, and lump charcoal for metallurgical needs are expected to grow to \$6.5 Billion by 2023, used for smelting of iron ore, hardening of steel, and production of pure silicon and ferro-silicon materials (P&S Market Research,

September, 2019).

Recreation-based tourism is a growing job sector, with the region abounding with recreational opportunities, including water sports (fishing, canoe/kayak/rafting, swimming), hiking, off-road biking, rock climbing, and wintertime activities including cross-country and downhill skiing. Recreation examples include the 78-mile Greenbrier River rail trail, one of 50 Millennium Legacy Trails in the U.S., where visitors hike, bike, ride horses, and camp. The 23-mile Meadow River Rail Trail is under construction, with sections now open for visitor use.

To compliment the tourism industry efforts to develop outdoor recreation gear providers is also a focal point for economic development in the Greenbrier River/Meadow River Basins area. This tourism rich expanse coupled with an easily accessible Interstate Highway System (I-64) and a regional airport makes for the establishment of an excellent outdoor gear business culture.

West Virginia Region 4 Planning & Development Council (hereafter referred to as “Region 4”) is heading up these economic diversification efforts, targeting locations and areas within the rural Greenbrier and Meadow River watersheds as focal points to jointly grow these industries, and re-grow local populations, utilizing brownfield sites that will play a major role in these advancements. These two watersheds are located within the 5-county rural area served by Region 4, which includes Webster, Nicholas, Pocahontas, Greenbrier and Fayette counties, and a total population of 119, 018 (U.S. Census data, 2018 estimates).

ii. Description of the Priority Brownfield Sites

Region 4 has established an initial list of brownfield sites in the two targeted watershed areas to facilitate economic diversification efforts. A few example priority brownfield properties include:

-Former Black Diamond Mining Coal Loadout, Sam Black Church - Located adjacent to Exit 156 on Interstate 64 and near the Meadow River, this property, combined with adjacent land, is comprised of approximately 30 acres. Formerly used as a coal loading facility, this property has been selected as a potential future industrial park. A Phase I was conducted on the property in 2019, and a Phase II Environmental Site Assessment (ESA) is needed to determine presence of environmental impacts, including the potential for heavy metals from coal storage, and petroleum contamination from diesel fuel use and storage.

-Former Drennen / Grant Retail Properties, Rainelle – Near the Meadow River and along Main Street in Rainelle, the Drennen / Grant site was formerly two retail business locations. The buildings have been removed; however, petroleum contamination has been documented in soils and groundwater. This location, within a federally designated flood plain, has been targeted by the Town of Rainelle for future green space, community park, and / or parking for future visitors that will be using the nearby Meadow River Rail trail. Additional ESA activities are needed to define the extent of contamination and development of a corrective action plan for site re-use.

-Former East Rainelle Grade School, Rainelle – Near Main Street and on a knoll overlooking the Meadow River, this former school property is owned by the Town of Rainelle and has been evaluated for future use for new business. The severely dilapidated buildings must be demolished in order for the site to be redeveloped. Asbestos-containing materials and lead-based paint are the primary contaminants of concern, which must be assessed to determine abatement costs as part of site redevelopment planning activities.

-Mullican Lumber Sawmill, Ronceverte – Closed since 2009, this location is adjacent to the Greenbrier River and within a federally designated flood plain. With its location next to Mullican Lumber’s flooring facility, this site is considered a prime location for value-added wood products manufacturing. Environmental concerns from historical sawmill operations primarily includes petroleum contamination from equipment and timber transfer operations.

Additional brownfield sites of interest include former gas station properties, retail business locations, and former sawmill properties that, based on location, have future potential for reuse to

FY2020 EPA Brownfields Assessment Grant Application

WV Region 4 Planning & Development Council – Greenbrier and Meadow River Watersheds

support wood manufacturing businesses, or recreational-based businesses and amenities.

b. Revitalization of the Target Area

i. Reuse Strategy and Alignment with Revitalization Plans

The projected redevelopment of priority brownfield sites within the adjacent Greenbrier and Meadow River watersheds aligns with Region 4's Mission and current Comprehensive Economic Development Strategy. Region 4's Mission is to strategically and effectively plan for the comprehensive development of our 5-county service area, and includes priority areas of focus concerning economic development, community development, and resource development. Two specific goals in Region 4's Comprehensive Economic Development Strategy are in direct alignment with this project, including:

- 1) "Working toward a strong, diversified economy with a mixture of industrial, tourism and commercial goods and services", and
- 2) "Developing viable downtown areas to attract and expand job opportunities".

Regarding plans to expand the value-added wood products industry, Region 4 has partnered with and is utilizing efforts and activities from the WV Forest Products Marketing & Manufacturing Cooperative. This cooperative was created in 2017 to build capacity in value added forest product businesses, and to make these businesses more efficient and profitable while strengthening market access for their products. This cooperative is expected to produce a thriving, diverse and sustainable forest products industry that provides good paying jobs throughout the region.

Connected to on-going plans to expand the recreation-based tourism in the region, this redevelopment strategy not only aligns with Region 4's Comprehensive Economic Development Strategy, but also supports the West Virginia State Tourism Plan. This State plan, called the "*West Virginia Ten Year Tourism Plan*", predicts and focuses on major growth in the recreation and tourism industries, including one goal focusing specifically on additional amenities related to easily accessible rivers (like the Greenbrier and Meadow Rivers), and increased visibility for culture, recreation, and history resources. West Virginia has seen a slow and steady increase of tourism in the past two decades, and this plan provides resources and guidelines to continue and increase this growth, focusing on high quality recreation-based investment strategies to capitalize on future expansion.

ii. Outcomes and Benefits of Reuse Strategy

Subsequent redevelopment of brownfield properties in the targeted area will help stimulate new economic development in Region 4's service area by returning vacant buildings, abandoned properties, and underutilized sites to productive use, attracting new business and capital investments, increasing property values, adding employment, and increasing tax revenues. A current value-added wood products example is a regional silicon manufacturing company that's using 7,500 tons of lump charcoal per year, produced outside of the Appalachian Region. Due to increased costs, the company is interested in developing a local source for this material to cut costs and increase profits. At this time, no lump charcoal is being manufactured in the entire region. A feasibility study to construct a lump charcoal manufacturing facility has been completed, using local and regional timber. Initial estimates include \$13 million in capital expenses, 25 new full-time jobs at the facility, plus additional support jobs with local businesses associated with timber harvesting and transportation.

Benefits from increasing the region's growing tourism industry will also be secured with this redevelopment strategy. As an example, the Greenbrier River Trail currently generates over \$5 Million in visitor spending each year (Institute for Service Research, "*The Economic Significance and Impacts of WV State Parks and Forests*", 2015). Once completed, the Meadow River Rail Trail can be expected to generate similar spending, but will need new support businesses including hotels,

restaurants, grocery stores and convenience stores to capitalize on these new revenues. Utilization of strategically located brownfield sites will ensure new revenues are maximized, adding new retail service businesses, jobs and tax revenues.

Additional greenspace is envisioned on part of the *Former Drennen / Grant Retail Properties*. In addition, some of the smaller brownfield properties located along the Greenbrier and Meadow Rivers will likely prove to be best suited for local greenspace use and/or public access locations, improving aesthetics in the local communities and attracting more visitors to the local area. In the event buildings being redeveloped have appreciable amounts of rooftop space with adequate southern sky exposure, solar panel installations will be considered as a means of providing additional electrical energy generation for on-site use, as this region has the highest solar power generation capacities for all of WV (reference: WV Energy Office).

The target area is situated within or immediately adjacent to two federal Opportunity Zones (#54025950100 and #54025950700). One of the Region's primary assets, the Monongahela National Forest, will greatly benefit from improved economic development in the target areas. The Mon Forest resides in 4 of the 5 Counties of Region 4. Anticipated redevelopment projects associated with this grant are expected to promote future "opportunity" funding, by enhancing local economic development through job creation and by purchasing of local goods and services as economic development occurs.

c. Strategy for Leveraging Resources

i. Resources Needed for Site Reuse

As a multi-purpose regional entity recognized by the State of WV, Region 4 is eligible for all major categories of federal, state, and private funding sources. However, these financial sources don't normally include funding specifically for conducting environmental assessments, which are often required to be completed prior to obtaining funds for site redevelopment. This project will support Region 4's efforts to secure funding from various governmental agencies and private foundations.

Funding resources available to augment this project are available from various entities. A federal example is the Appalachian Regional Commission (ARC), a congressionally designated commission specifically for the purpose of retaining and expanding the economy of the Appalachian Region. ARC grant opportunities include planning, technical assistance, and construction projects. All of Region 4's service area is eligible for ARC funding. Three of the five Counties in Region 4 are designated as distressed by ARC which is a glaring indicator of the severity of the Region's economic condition. A key State-funded resource is the WV Tourism Office. This Office is currently receiving additional funding set aside (\$13Million in 2019) specifically for marketing and development of recreational-based tourism. The recreational tourism aspect of this project aligns for potential use of this State funding resource. A significant private foundation available to Region 4 is the Claude Worthington Benedum Foundation, a private foundation supporting local community-based projects throughout WV for 75 years. This Foundation provides funding for capacity building, economic development planning and feasibility studies, education and community development projects. Region 4 has successfully utilized Benedum Foundation funding in the past and will be evaluating potential opportunities for future project funding as this project progresses.

ii. Use of Existing Infrastructure

Existing water, sewer, and electricity services within the targeted area are of the needed size and capacity to be utilized for the planned brownfield redevelopments. Broadband and high-speed internet is not available in all of the target area. However, the State of WV is currently engaged in a multi-million-dollar project to increase broadband and high-speed internet service to rural parts of the State, including the targeted Greenbrier and Meadow River watershed area. Interstate 64, U.S.

FY2020 EPA Brownfields Assessment Grant Application

WV Region 4 Planning & Development Council – Greenbrier and Meadow River Watersheds

Rt. 60, U.S. Rt. 19 and U.S. Rt 219 provide full access throughout the region. The Greenbrier Valley Regional Airport is located within the target area, providing air travel opportunities in and out of the region. No significant additional infrastructure is required for this project to be successful.

2. COMMUNITY NEED AND COMMUNITY ENGAGEMENT

a. **Community Need**

i. The Community's Need for Funding

The Greenbrier and Meadow River watershed area has experienced a significant population decline since the mid-1900s, **losing generally between 25 and 40% of local town populations**. Throughout Region 4's service area, the population has reduced by approximately 35% (182,516 in the mid 1900's; 119,345 estimated in 2018, U.S. Census data). The decrease in timber harvesting, coal mining and associated support jobs across the targeted area has greatly impacted the economy of the once-thriving region. The area currently produces only about 15% of the coal it produced less than a decade ago. Recent hardwood timber sales have declined in some markets by up to 60% in just the past year. These economic conditions have resulted **in increased county poverty rates of up to 26.7% for the area, compared to the U.S. average of 14.6%** (Census Reporter, 2018 estimate). Even with the reduced populations, unemployment rates in counties across the target area are higher than the U.S. rate, as high as 5.3%, well above the national rate of 3.7%. With these difficult economic conditions and a decreasing population base, the area is unable to draw on other sources of funding for these brownfield sites. In addition, WV does not currently provide any State funding for environmental assessment and remediation activities. This project will attract new investments to the region by identifying and addressing environmental issues associated with brownfield sites of priority interest. The project will also help the region redevelop economically by focusing on additional value-added wood products manufacturing, increased recreational tourism and outdoor recreational gear providers.

ii. Threats to Sensitive Populations

(1) Health or Welfare of Sensitive Populations

All of the 5-county area served by Region 4, including the Greenbrier and Meadow River watershed target area, has a progressively aging and elderly population. The median age is as high as 48.6, about 30% higher than the national median age of 37.8. **Up to 32% of the population in the area is above 60 years of age, compared to the national average of 21%** (data from Census Reporter, October 2019). These older populations are the largest sensitive populations in the area and have unique health concerns that at times can be connected to environmental contaminants. The aging population of the region is especially susceptible to impacts to their health and welfare from environmental contaminants suspected to be present on the priority sites. The EPA's Science Inventory states "older adults are indeed susceptible to some of the effects of environmental hazards", and according to Health Resources & Services Administration, this elderly population, combined with the area having restricted access to health care, is in a region that has been designated as a "Medically Underserved Rural Area".

The County Health Rankings & Roadmaps program measures vital welfare factors to rank counties throughout the U.S. Their 2018 rankings report indicated three of the five counties in Region 4's service area, all with high elderly populations, are classified as **the unhealthiest counties in WV**, the state with the highest overall rate of residents with poor health in the entire U.S. (documented by Centers for Disease Control and Preservation, 2018). By encouraging the redevelopment of brownfield properties, this project will not only mitigate potential environmental exposure but will also aid in reducing potential exposure of the significant older "at-risk" populations to environmental impacts.

(2) Greater Than Normal Incidence of Disease and Adverse Health Conditions

As stated in the previous section, the Region 4 area includes some of the unhealthiest county statistics in WV, and in the entire country. WV has the 5th highest cancer rate (13.7%), second highest

FY2020 EPA Brownfields Assessment Grant Application

WV Region 4 Planning & Development Council – Greenbrier and Meadow River Watersheds

obesity rate (35.7%), and the highest rates of diabetes (14.1%) and cardiovascular disease (14.1%) in the U.S. The 5 counties within the Region 4 service area are consistently among the State's higher-ranking counties in multiple health risk categories, including cardiovascular disease, prevalence of cancer and cancer death rates, poor physical health, poor mental health, prevalence of obesity, asthma and diabetes. As an example, out of 55 WV counties, Webster County ranks 12th in cardiovascular disease, 7th in asthma, 21st in prevalence of cancer and cancer death rates, and 2nd in poor physical health (data from WV Health Statistics Center, 2018). Other Region 4 counties have similar statistics.

Additionally, a regional study suggests adverse health conditions in the area. Based on research in 2017 from the University of Virginia, rural Appalachia, including all of Region 4's service area, is **"disproportionately impacted by environmental health issues and the resulting health outcomes"**. This study states cancer incidence has declined in much of the country since 1969, but in rural Appalachia, the cancer mortality rate is 19% higher than urban, non-Appalachian populations in the U.S. This research also states economic, social, and environmental factors including the historic timber harvesting, coal mining, and rail operations in the area as some of the reasons for these disproportions. The assessment and eventual remediation and redevelopment of brownfield properties will reduce the targeted community's exposure risk to suspected contaminants and in the long term, will help lower the incidence of cancers, cancer mortality rates, complications with asthma and overall poor physical health conditions found in throughout Region 4's target area.

Region 4 has been ravaged by the effects of substance abuse causing staggering economic impacts at all levels of society. A report published by the Appalachian Regional Commission titled "Opioids in Appalachia- The Role of Counties in Reversing a Regional Epidemic" Section 5. Mitigate Local Economic Impacts and Consider Development Strategies indicates counties should leverage their local strengths which is exactly what elimination of contaminants and re-use of brownfields will help accomplish. Many times, brownfield locations harbor illegal drug use activities therefore re-inventing the use of the area brings a twofold economic effect, eliminating a very expensive drain on law enforcement and medical agencies and then creating new economic development opportunities on viable re-claimed property.

(3) Disproportionately Impacted Populations

Counties in Region 4's service area have **poverty levels as high as 26.7%**, a rate more than 45% higher than the national average of 14.6% (U.S. Census, 2018). **Median household income levels are as low as \$33,390, nearly 46% below the national average of \$61,372** (U.S. Census, 2018). **Per capita income is as low as \$20,314, nearly 35% lower than the current U.S. rate of \$31,177**. Job losses in past years, combined with fixed incomes associated with many of the elderly population, have contributed to the current high poverty rates and low-income levels. As jobs have left and businesses closed, potentially hazardous brownfield sites remain, many located in the poorest areas within the Greenbrier and Meadow River watershed target areas. The environmental injustice of these poorest population areas having higher numbers of known brownfield sites will be addressed with this project, promoting new developments on brownfield sites while creating jobs and greenspace, and ultimately reducing health risks at the local level.

b. Community Engagement

i. and ii. Project Involvement and Project Roles:

Region 4 has assembled a Community Steering Committee (CSC) for this specific project. The CSC is comprised of local organizations, county economic development entities, non-profit groups, and State-affiliated organizations providing project input and expertise. Within these groups are local business owners, local and retired residents, local government representatives, and non-profit representatives, all with the common goal of bringing new and sustainable economic development into the region. These community partners will be responsible for soliciting additional community

FY2020 EPA Brownfields Assessment Grant Application

WV Region 4 Planning & Development Council – Greenbrier and Meadow River Watersheds

involvement and providing local community engagement and interaction throughout the grant period. Information and project responsibilities of CSC Partners are provided in the following table:

Project Partner	Contact Information	Project Responsibility
Greenbrier River Watershed Association	John Walkup, President 304/647-4792	Site inventory, community engagement, site re-use input, meeting space
Meadow River Valley Association	Matt Ford, President 304/520-4260	Site inventory, community engagement, site re-use input, meeting space
Greenbrier Valley Economic Development Corp.	Chase McClung, Director 304/497-4300	Site inventory, site redevelopment input, public meeting host
Greenbrier Long Term Recovery Committee	Arron Seams, Executive Chair 304/645-6800	Local community engagement, site redevelopment input
WV Brownfields Assistance Center	George Carico, Director 304/696-5456	Project management and technical support, community engagement, site inventory updates
WV Forest Products Cooperative	Joseph Howard, CEO 859/242-1894	Site redevelopment input for wood products manufacturing

In addition, this project will be supported and closely monitored by the West Virginia Department of Environmental Protection's Brownfields Program (John Meeks, Project Manager, Phone 304/926-0499, extension 1268). Mr. Meeks will be providing project guidance and technical support.

iii. Incorporating Community Input

The CSC will act as the central outlet for distributing information and promoting public participation. Quarterly public meetings will be held, adhering to COVID-19 restrictions, with information provided in easy-to-understand fact sheets and project summaries that can then be used among the many local community groups. Virtual meeting platforms and telephone call-in methods will be utilized in addition to allowable "in-person" events. With a large elderly and poor population, easily accessible, low-tech communication methods will be utilized. In addition to quarterly website updates and presentations, the CSC will distribute information to local supporting community groups for their review and comment. Local community groups include area churches, miscellaneous clubs and organizations, and local newspapers. Sign-in sheets for follow-up communication will be kept at each meeting, with public comments and input documented, evaluated, and incorporated (if applicable) into the project. Public comments and/or inquiries will be addressed and responded to in a timely manner. Since over 99 % of the local community speaks English as a primary language (*U.S. Census data, 2019*), all information will be in English..

3. TASK DESCRIPTIONS, COST ESTIMATES, AND MEASURING PROGRESS

a. Description of Tasks, Activities and Outputs

Region 4 will complete the tasks and activities as outlined in the following table:

Task / Activity 1: Project Management and Reporting
i. <i>Project Implementation:</i> Project management and oversight, cooperative agreement oversight, and all required reporting will be the responsibility of Region 4. A qualified environmental professional (QEP) experienced in EPA Brownfields funded projects will be hired through a

FY2020 EPA Brownfields Assessment Grant Application
WV Region 4 Planning & Development Council – Greenbrier and Meadow River Watersheds

competitive bid process. Updates and additions to the current site inventory, site selection and interaction with current property owners on sites of interest for securing site access will occur throughout the 36-month project timeframe. EPA funds will only be used on sites with the highest potential for redevelopment success.
ii. Anticipated Project Schedule: Month 1 through Month 36
iii. Task / Activity Lead: John Tuggle and Amanda Smarr, Region 4
iv. Outputs: 12 quarterly project status reports, 12 quarterly financial status reports
Task / Activity 2: Public Involvement
i. Project Implementation: Region 4 and the CSC will lead public involvement efforts, assisted by the QEP. Quarterly public meetings and updates to social media and websites, project brochure, and articles for media updates are included in this task.
ii. Anticipated Project Schedule: Month 1 through Month 36
iii. Task / Activity Leads: Amanda Smarr, Region 4; assisted by CSC and QEP
iv. Outputs: 12 CSC public meetings, 1 project brochure, 2 articles for media communications
Task / Activity 3: Site Assessments
i. Project Implementation: Phase I Environmental Site Assessments (ESA's) will be performed in accordance with ASTM Standard E1527-13 and the EPA "All Appropriate Inquiry Final Rule" on approved sites. Phase II ESA's will be conducted in accordance with ASTM E1903-11. Asbestos Containing Material (ACM) Inspections and Lead-Based Paint (LBP) Surveys will be completed, as needed, following State and Federal guidelines. A Quality Assurance Project Plan (QAPP), Sampling and Analysis Plan (SAP), and Health and Safety Plan (HSP) will be prepared and approved by EPA prior to Phase II ESA activities.
ii. Anticipated Project Schedule: Month 3 through Month 30
iii. Task / Activity Lead: QEP
iv. Outputs: 10 Phase I ESA's, 1 QAPP, 1 SAP, 1 HSP, 6 Phase II ESA's, 4 ACM Inspections and/or LBP surveys.
Task / Activity 4: Planning for Cleanup and Redevelopment
i. Project Implementation: After Phase II ESA's have been completed, the selected QEP will lead the development of cleanup plans on sites determined to be highest priority with applicable environmental impacts of concern. These activities will include the development of Analysis of Brownfield Cleanup Alternatives (ABCA), Endangered Species Surveys, Cultural and Historical Resource Surveys, and ACM / LBP abatement or management plans.
ii. Anticipated Project Schedule: Month 13 through Month 35
iii. Task / Activity Leads: QEP, assisted by Region 4 and CSC
iv. Outputs: ABCA documents, ACM / LBP Abatement / Management Plans, Endangered Species Surveys, Cultural and Historical Resource Surveys; estimated 5 documents total

b. Cost Estimates

The following cost breakdowns have been estimated based on information from other communities that have recently received EPA brownfields grants, and assistance from qualified environmental professionals experienced in the EPA brownfields assessment grant program:

Budget Categories	Project Tasks – Hazardous Sites				
	1-Project Management and Reporting	2-Public Involvement	3-Site Assessments	4-Planning for Cleanup and Redevelopment	Total \$

FY2020 EPA Brownfields Assessment Grant Application
WV Region 4 Planning & Development Council – Greenbrier and Meadow River Watersheds

Personnel	\$6,000	\$6,000			\$12,000
Fringe					
Travel	\$3,600				\$3,600
Equipment					
Supplies		\$1,600			\$1,600
Contractual	\$5,400	\$5,400	\$252,000	\$20,000	\$282,800
Other					
Total	\$15,000	\$13,000	\$252,000	\$20,000	300,000

Budget Category Details:

Personnel Costs: 16 hours per month (8 hours hazardous and 8 hours petroleum) for 36 months, 576 hours total, average rate of \$20.83/hr. = \$12,000 (rounded up from \$11,998.08)

Travel Costs: 1 staff person to attend 3 state brownfield workshops/conferences (3x\$600/person); 1 staff person to attend national EPA brownfields conference (1x\$1,800/person); Total = \$3,600

Supplies: Presentation materials, printing costs, folders, copy paper, etc., = estimated \$1,600

Contractual Costs: QEP providing assistance on Project Management (72 hours at \$75/hr., \$5,400); Assistance on Public Involvement (72 hours at \$75/hr., \$5,400); QAPP/SAP/HSP reports (1 combined report for project, total cost of \$8,000); 10 Phase I ESA's, average cost \$4,000 per report (6 hazardous, 4 petroleum reports); 6 Phase II ESA's, average cost \$34,000 per report (4 hazardous, 2 petroleum); Endangered Species/Cultural and Historical Resource Survey Reports, ACM / LBP Inspections, and /or ABCA documents (4 hazardous and 1 petroleum, 5 total reports at an estimated average cost of \$4,000 each) = \$282,800

c. Measuring Environmental Results

Region 4 will hold monthly conference calls with the QEP to review progress and take corrective actions, when necessary, to ensure the funds are expended in an efficient and timely manner. Region 4 and the CSA will meet quarterly to review community priorities, address any community concerns, and guide the project. Region 4 will submit Quarterly Reports in a timely manner, detailing the outputs and outcomes of the project, and enter and track site-specific information in the online ACRES database. At a minimum, outputs to be tracked include the number of meetings held, environmental assessments completed, ABCAs and/or redevelopment plans completed. Outcomes to be tracked include number of community participants, acres assessed for environmental assessment, acres ready for reuse, redevelopment funding leveraged, and jobs created. Some projected outcomes will occur after the conclusion of the project period and will continue to be tracked.

4. PROGRAMMATIC CAPABILITY AND PAST PERFORMANCE

a. Programmatic Capability

i. Organizational Structure and **ii. Description of Key Staff**

Region 4 is a multi-purpose regional economic development entity established by WV State legislative action in 1971 which is dedicated to strategically and effectively planning for the comprehensive development of its 5-county area. Region 4 operates under the direction of an appointed Council, which includes a representative from every county and municipality within its service area. The Region 4 Council includes a Council Chairman, Council Vice-Chairman, Secretary and Treasurer, all elected from within Council membership. The Region 4 Council will be kept up to date on project advancements throughout the project period, with updates provided at each Council meeting (minimum of 3 Council meetings per calendar year). Region 4 personnel will provide programmatic oversight in management of the grant to ensure timely and successful expenditure of funds. Executive Director John Tuggle PE PS has over 30 years of experience and will provide project oversight. Mr. Tuggle is a licensed engineer in WV, VA, and OH and has been involved in

FY2020 EPA Brownfields Assessment Grant Application

WV Region 4 Planning & Development Council – Greenbrier and Meadow River Watersheds

virtually every level of infrastructure and site development . Over the past 7 years he has focused almost all his energy in the development and administration of Federal, State and local public projects utilizing funding packages from almost every sector of government. The Point of Contact and Project Manager assigned to this project is Amanda Smarr. Ms. Smarr will oversee day-to-day management and operations of the project. Ms. Smarr has experience in project management, labor compliance, and Geographic Information Systems (GIS). Assisting Amanda will be Community Project Specialist Cassandra Lawson. Ms. Lawson has experience in project management and infrastructure and economic development. Together, this project team has more than 39 years' experience in economic development and are fully qualified to administer and complete the project.

iii Acquiring Additional Resources

Region 4 will use a competitive procurement process, adhering to the procedures detailed in 2 CFR Part 200 and EPA Rule 2 CFR Part 1500 on "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards", to hire a qualified environmental professional (QEP). The selected QEP will be experienced in EPA Brownfields Assessment grant projects and will assist Region 4 in implementing this brownfields project. In the event additional resources are identified that are required to complete this project, Region 4 will follow the same procedure, using a competitive procurement process to hire the appropriately experienced consultant or contractor.

b. Past Performance and Accomplishments

ii. Region 4 has not previously received an EPA Brownfields Grant but has Received Other Federal or Non-Federal Assistance Agreements

(1) Purpose and Accomplishments

Region 4 has not received any EPA Brownfields grants but has received other federal and non-federal assistance agreements. Three examples are included in the following table:

Project and Location	Funding Source / Amount	Accomplishments
Broadband Initiative for Southern WV	CDBG, EDA/ \$500,000	Develop a Regional Broadband backbone strategy to provide infrastructure needed to expand broadband services within WV
City of Lewisburg Water Treatment Plant Water Application	USDA/\$39,028,000	Updated City of Lewisburg water treatment plant to better serve the customers and residents.
Cowen PSD- Upper Glade Sewer Improvements Phase II	ARC, USDA/ \$4,400,000	Extend sewer service to serve 161 additional customers.

(2) Compliance with Grant Requirements

Region 4 successfully managed and met all of the requirements and conditions of the funded projects described above. Projects were completed according to work plans and schedules, achieving the expected results. All required reporting was done in a timely manner. Region 4 received no negative outcomes, and there were no compliance issues with any of these projects.

Documentation of Applicant Eligibility

Region 4 Planning and Development Council resides in the category of "Regional Council or group of General Purpose Units of Local Government". This designation allots Region 4 Planning and Development Council eligibility to apply for the Brownfields Grant.

CHAPTER 8. MUNICIPAL CORPORATIONS.

Article 24

All Articles

Article 26

ARTICLE 25. INTERGOVERNMENTAL RELATIONS -- REGIONAL PLANNING AND DEVELOPMENT.

§8-25-5. Formation of regional councils; purpose; receipt of funds and assistance; effect on interstate planning commissions and other existing organizations.

- (a) The Governor shall provide for an organizational meeting of each of the regional councils within sixty days after his certification pursuant to section four of this article. He shall notify the president of each county court and the mayor of each municipality of the region of the time and place of such meeting. The official so notified shall attend this meeting or shall designate a representative. In the case of the county court, another member of the court shall be the designee or, in the case of a municipality, a member of the governing body of such municipality shall be the designee. Those present shall constitute a quorum and shall select a temporary chairman and secretary and shall provide for a subsequent meeting or meetings at which time the members provided for in section six of this article shall be nominated and elected and the permanent organization and bylaws established.
- (b) Each regional council formed pursuant to this article shall fulfill the purposes of development regions and shall be eligible to receive state funds and technical assistance in accordance with the provisions of this article.
- (c) (1) Nothing herein contained shall in any way limit or restrict the powers, duties and responsibilities of planning bodies organized under article twenty-six of this chapter relating to interstate planning commissions.
- (2) Interstate planning commissions in existence on the effective date of this article are hereby designated as the planning and development councils for the region, insofar as the West Virginia member counties of such interstate planning commissions are concerned, and such commissions

shall be empowered to act as the planning and development councils for such regions insofar as the West Virginia member counties are concerned.

(3) When additional West Virginia counties are added, under the provisions of this article, to such interstate planning commissions, their membership in such commissions shall comply, insofar as the West Virginia counties are concerned, with the council membership requirements of this article.

(4) Regional councils or commissions established under this article and article twenty-six of this chapter may, at the option of the county courts of the participating West Virginia counties, continue to have all the powers, duties and responsibilities permitted and required under said article twenty-six, in addition to the powers, duties and responsibilities provided herein for regional councils.

(5) State regional councils or commissions and their corresponding boundaries in existence on the effective date of this article, which were established under the former provisions of this article, and any nonprofit corporation in existence on the effective date of this article, which was established under chapter thirty-one of this code and pursuant to section eighteen, article five, chapter seven of this code and which has had in its employ a full-time paid executive staff for a period of no less than six months immediately prior to the effective date of this article, may be designated by the Governor as planning and development regions and regional councils. Such designation shall be made within sixty days after the effective date of this article. Regional councils so designated shall have a period of six months from the date of designation to comply with the membership structure required by this article. Nothing herein contained shall be construed to deprive such existing state regional councils of their legal authority prior to the expiration of the aforementioned six-month period.

Previous §8-25-4. Delineation of regions and recommendations of Governor thereon; publication of statement fixing regional boundaries; public hearings; certification of regional boundaries; change in boundaries.

§8-25-5. Formation of regional councils; purpose; receipt of funds and assistance; effect on interstate planning commissions and other existing organizations.

Next §8-25-6. Membership, organization, etc., of regional council; executive committee; officers and personnel.

Description of Community Involvement

The needs for the target areas of the Greenbrier and Meadow River Watersheds are very similar, both hold a significant amount of low-moderate income residents, meaning contacting residents within these target areas may require additional measures such as creating fact sheets or brochures of the project. The plan for involving the community will also consist of establishing public meetings, providing project updates in regularly scheduled community and town meetings as well as keeping track of community input in regard to the project.

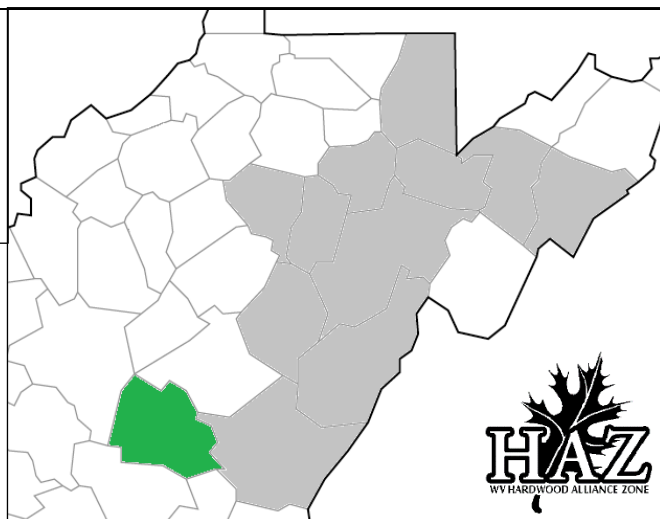

Progress and status updates will be given on a scheduled basis, provisionally once a month during City and Town Council meetings, to allow the community members to remain involved with the project and provide input as needed. Scheduled meetings will be posted in the local newspaper a week prior to the meeting date to allow community members ample notice of meeting times and locations. Region 4 Planning and Development Council as the potential grant recipient will ensure the communities are informed of the project status and that each community engagement activity is tailored to specifically meet the needs of each targeted community and coalition member. The stated communication plan should prove to be appropriate and effective for the target areas as this plan allows all community members the opportunity to attend the progress and status update meetings and provide input if desired.

Expenditure of Assessment Grant Funds

Region 4 Planning and Development Council does not have an active EPA Brownfields Assessment Grant.

West Virginia Hardwood Alliance Zone

Fayette County FPI Economic Contribution, 2017

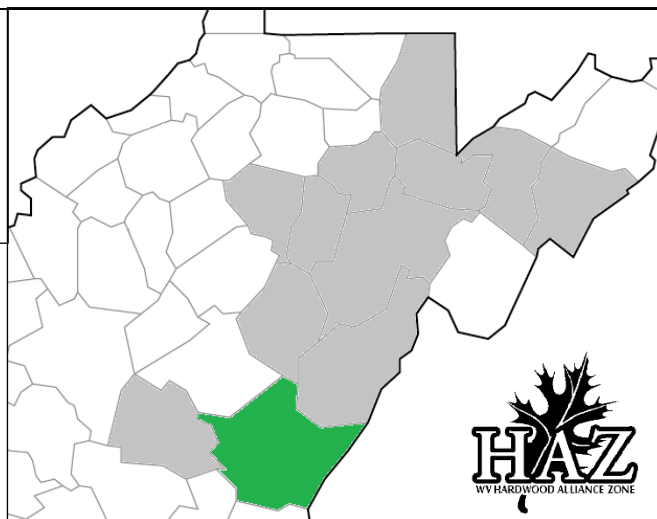

- Fayette County is the 4th largest county in the HAZ by area. Of its 339,000 acres of forestland, 84% was classified as privately-owned timberland in 2017. For the year, 7.7 million board ft of sawtimber was harvested from the county.
- In 2017, 115 jobs in the county were directly in the forest products industry, or 0.8% of all employment. This compares to the industry accounting for 4.5% of all jobs in the HAZ as a whole and 1.1% of statewide employment.
- The FPI in the county had direct output, or sales, of \$35.2 million. When taking into account the broader economic activity spurred by the industry, it supported nearly \$43 million in output in the county.
- For every 1 job in the FPI, an additional 0.57 jobs were supported by the industry in the county. This is reflected by an employment multiplier value of 1.57 listed in the table below.
- The county's industry was largely concentrated in its Primary Solid Wood Products sector, which provided approximately half of the industry's direct jobs and value added (or contribution to gross product) and approximately 4/5 of its output and employee compensation. The Logging sector was the largest contributor of value added for the year.
- There was no reported activity in the Secondary Solid Wood Products or Secondary Paperboard and Other Paper Products sectors. The negative value added of the Wood Furniture sector is a result of a negative proprietor income (which is a component of value added) in the sector for the year. The lack of employment and employee compensation in the Pulp, Paper and Paperboard sector is likely a result of worker/owners reporting their compensation as proprietor income.

The direct contributions of the Fayette County forest products industry for 2017.

Forest Product Sector	Output (\$)	Employment	Value Added (\$)	Employee Compensation (\$)
Forestry	100,269	7	71,556	74,028
Logging	7,088,801	40	6,204,336	750,868
Primary Solid Wood Products	27,492,670	63	5,719,163	3,824,710
Secondary Solid Wood Products	-	-	-	-
Wood Furniture	213,220	4	(113,642)	-
Pulp, Paper, and Paperboard	341,549	-	33,453	-
Secondary Paperboard and Other Paper Products	-	-	-	-
FPI Direct Contributions	35,236,509	115	11,914,866	4,649,606
Industry Multiplier	1.22	1.57	1.35	1.43
FPI Total Contributions	\$42,930,663	180	\$16,078,422	\$6,642,273

West Virginia Hardwood Alliance Zone

Greenbrier County FPI Economic Contribution, 2017

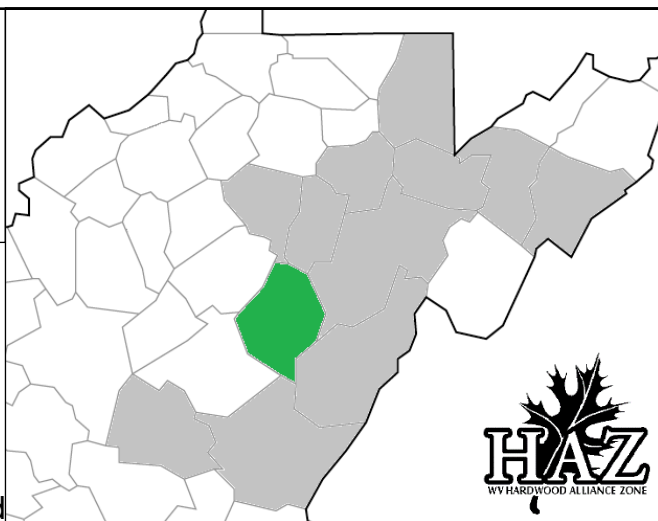

- Greenbrier County is the second largest county in the HAZ region and contained the second highest amount of forestland as of 2017. However, its 442,000 acres of private timberland ranked 1st among all HAZ counties.
- In 2017, an estimated 568 jobs, or 3.1% of all jobs in the county were directly located within the forest products industry. This figure compares to 1.1% for the industry statewide and 4.5% in the HAZ.
- The industry had direct output (or sales) of \$123.1 million. When taking into account the broader economic activity spurred by the FPI in the county, the industry supported \$167.1 million in sales.
- 44% of the County's FPI direct output was located in the Primary Solid Wood Products Sector while employment was much more broadly distributed throughout the Primary and Secondary Solid Wood Products and Logging Sectors.
- For every 1 job directly coming from the forest products industry in the county, an additional 0.63 jobs in the broader economy were supported. This is reflected by an employment multiplier value of 1.63 listed in the table below.
- Greenbrier County was the source of approximately 12% of the HAZ region FPI's direct output and employment and accounted for 5.6% of FPI direct employment in West Virginia.
- There was no reported activity in the Secondary Paperboard and Other Paper Products sector. There were also no reported employees in the Pulp, Paper, and Paperboard sector despite some sector output. This is likely the result of the sector having a large number of employee/proprietors.

The direct contributions of the Greenbrier County forest products industry for 2017.

Forest Product Sector	Output (\$)	Employment	Value Added (\$)	Employee Compensation (\$)
Forestry	1,500,390	44	1,296,245	1,252,746
Logging	28,715,803	155	25,310,633	2,901,886
Primary Solid Wood Products	54,633,724	162	10,677,558	8,147,389
Secondary Solid Wood Products	26,886,992	135	7,561,364	5,597,597
Wood Furniture	11,017,408	71	2,708,549	3,647,692
Pulp, Paper, and Paperboard	409,161	-	101,064	-
Secondary Paperboard and Other Paper Products	-	-	-	-
FPI Direct Contributions	123,163,478	568	47,655,413	21,547,309
Industry Multiplier	1.36	1.63	1.47	1.49
FPI Total Contributions	167,143,770	929	70,213,459	32,105,870

West Virginia Hardwood Alliance Zone

Webster County FPI Economic Contribution, 2017

- Webster County is the 6th smallest county in the HAZ by area. However, in 2017 its 337,000 acres of private timberland was the 3rd highest of any HAZ county.
- Nearly 400 jobs, or over 17% of all jobs in the county Were directly from the forest products industry. This Compares to 4.5% for the HAZ and 1.1% statewide and county for the year.
- The industry had direct output, or sales, of just over \$100 million. After taking into account the broader economic activity spurred by the industry's operations in the county, the industry supported \$120 million in total output.
- For every 1 job directly coming from the FPI, an additional 0.36 jobs were supported by the industry in the county. This is reflected by an employment multiplier value of 1.36 listed in the table below.
- The county's FPI was highly concentrated in the Primary Solid Wood Products sector which was the source of over 75% of its direct output and employee compensation and over 70% of it's direct employment. The Logging sector, however, was the largest contributor of direct value added or contribution to the county's gross product.
- The county was the source of 4.5% of the statewide FPI's direct output and 3.9% of its direct jobs.
- There was no reported activity in the pulp and paper related sectors or the Secondary Solid Wood Products sector for the year. The lack of reported employee compensation in the Forestry sector is likely due to worker/owner compensation being reported as proprietor income.

The direct contributions of the Webster County forest products industry for 2017.

Forest Product Sector	Output (\$)	Employment	Value Added (\$)	Employee Compensation (\$)
Forestry	94,291	1	89,576	-
Logging	23,762,045	112	21,302,740	2,402,488
Primary Solid Wood Products	76,465,034	285	13,675,163	11,821,320
Secondary Solid Wood Products	-	-	-	-
Wood Furniture	110,883	1	2,381	-
Pulp, Paper, and Paperboard	-	-	-	-

Appendix A - Data Sources and Calculations

Industry Data

Emsi industry data have various sources depending on the class of worker. (1) For QCEW Employees, Emsi primarily uses the QCEW (Quarterly Census of Employment and Wages), with supplemental estimates from County Business Patterns. (2) Non-QCEW employees data are based on a number of sources including QCEW, Current Employment Statistics, County Business Patterns, BEA State and Local Personal Income reports, the National Industry-Occupation Employment Matrix (NIOEM), the American Community Survey, and Railroad Retirement Board statistics. (3) Self-Employed and Extended Proprietor classes of worker data are primarily based on the American Community Survey, Nonemployer Statistics, and BEA State and Local Personal Income Reports. Projections for QCEW and Non-QCEW Employees are informed by NIOEM and long-term industry projections published by individual states.

Input-Output Data

The input-output model in this report is Emsi's gravitational flows multi-regional social account matrix model (MR-SAM). It is based on data from the Census Bureau's Current Population Survey and American Community Survey; as well as the Bureau of Economic Analysis' National Income and Product Accounts, Input-Output Make and Use Tables, and Gross State Product data. In addition, several Emsi in-house data sets are used, as well as data from Oak Ridge National Labs on the cost of transportation between counties.

Staffing Patterns Data

The staffing pattern data in this report are compiled from several sources using a specialized process. For QCEW and Non-QCEW Employees classes of worker, sources include Occupational Employment Statistics, the National Industry-Occupation Employment Matrix, and the American Community Survey. For the Self-Employed and Extended Proprietors classes of worker, the primary source is the American Community Survey, with a small amount of information from Occupational Employment Statistics.

DatabaseUSA.com Business-Level Data

Data for individual businesses is provided by DatabaseUSA.com, which maintains a database of more than 14 million U.S. business entities. Note that in aggregate it will not be consistent with Emsi labor market data due to differences in definitions, methodology, coverage, and industry/geographic classification.

Preface

This directory includes contact and production information for companies that make up the West Virginia Forest Products Industry. The purpose is to identify WV businesses as well as promote the use of West Virginia Forest Products in local, regional, national, and international markets.

The companies in this directory represent both the primary and secondary forest product industries in West Virginia and produce a multitude of products including: green lumber, kiln dried lumber, rustic rail fence, flooring, moulding/millwork, dimension parts, crossties/timbers/wood mats, pallets/ boxes/crates, engineered building products, cabinets, furniture, export and domestic sawlogs and veneer logs, log homes, veneer, charcoal, by-products, portable mill/custom sawing, custom drying, custom treating, mulch, wood pellets, and firewood.

In this edition, following the preface, are two new features. First, **maps** are now provided that provide the location and name of all the green lumber producers (sawmills) and kiln dried lumber producers in the state. Following the map section, there is an **alphabetical listing of companies**, with available phone, fax, email, website information, and county location.

On pages 13-21, we have produced a **table of producers by county** that lists each company and what range of products they manufacture. The table listing has been rotated to orient with the text, and the heading and column shading is color coordinated with the table category groupings in the index.

These features should allow readers to locate a company directly, determine its location (county), identify it on the provided maps, and obtain a detailed listing of the company and all products manufactured by that company.

The products are arranged in three categories: commercial products, consumer products, and other products.

Commercial products are generally produced in large quantities and sold in bulk to other companies for further processing to make other products or sold at the retail level. These products are shipped to regional, national, and international markets by truck, rail, or containers via ports throughout the United States.

Consumer products are items made with the individual customer in mind. Many of these companies are small businesses that offer a base product, but can customize the product built on the specifications of the consumer. These companies depend on direct communications with the consumer through local marketing efforts, phone calls, emails, or visits to the manufacturer's location. These products are typically sold to the local and regional markets, however many companies have established customers on the national level.

Other products are categories that do not fit well in the Commercial or Consumer groupings. These are companies with log or lumber yards, that buy logs or pulpwood, perform preservative treating, export logs, or produce and sell firewood.

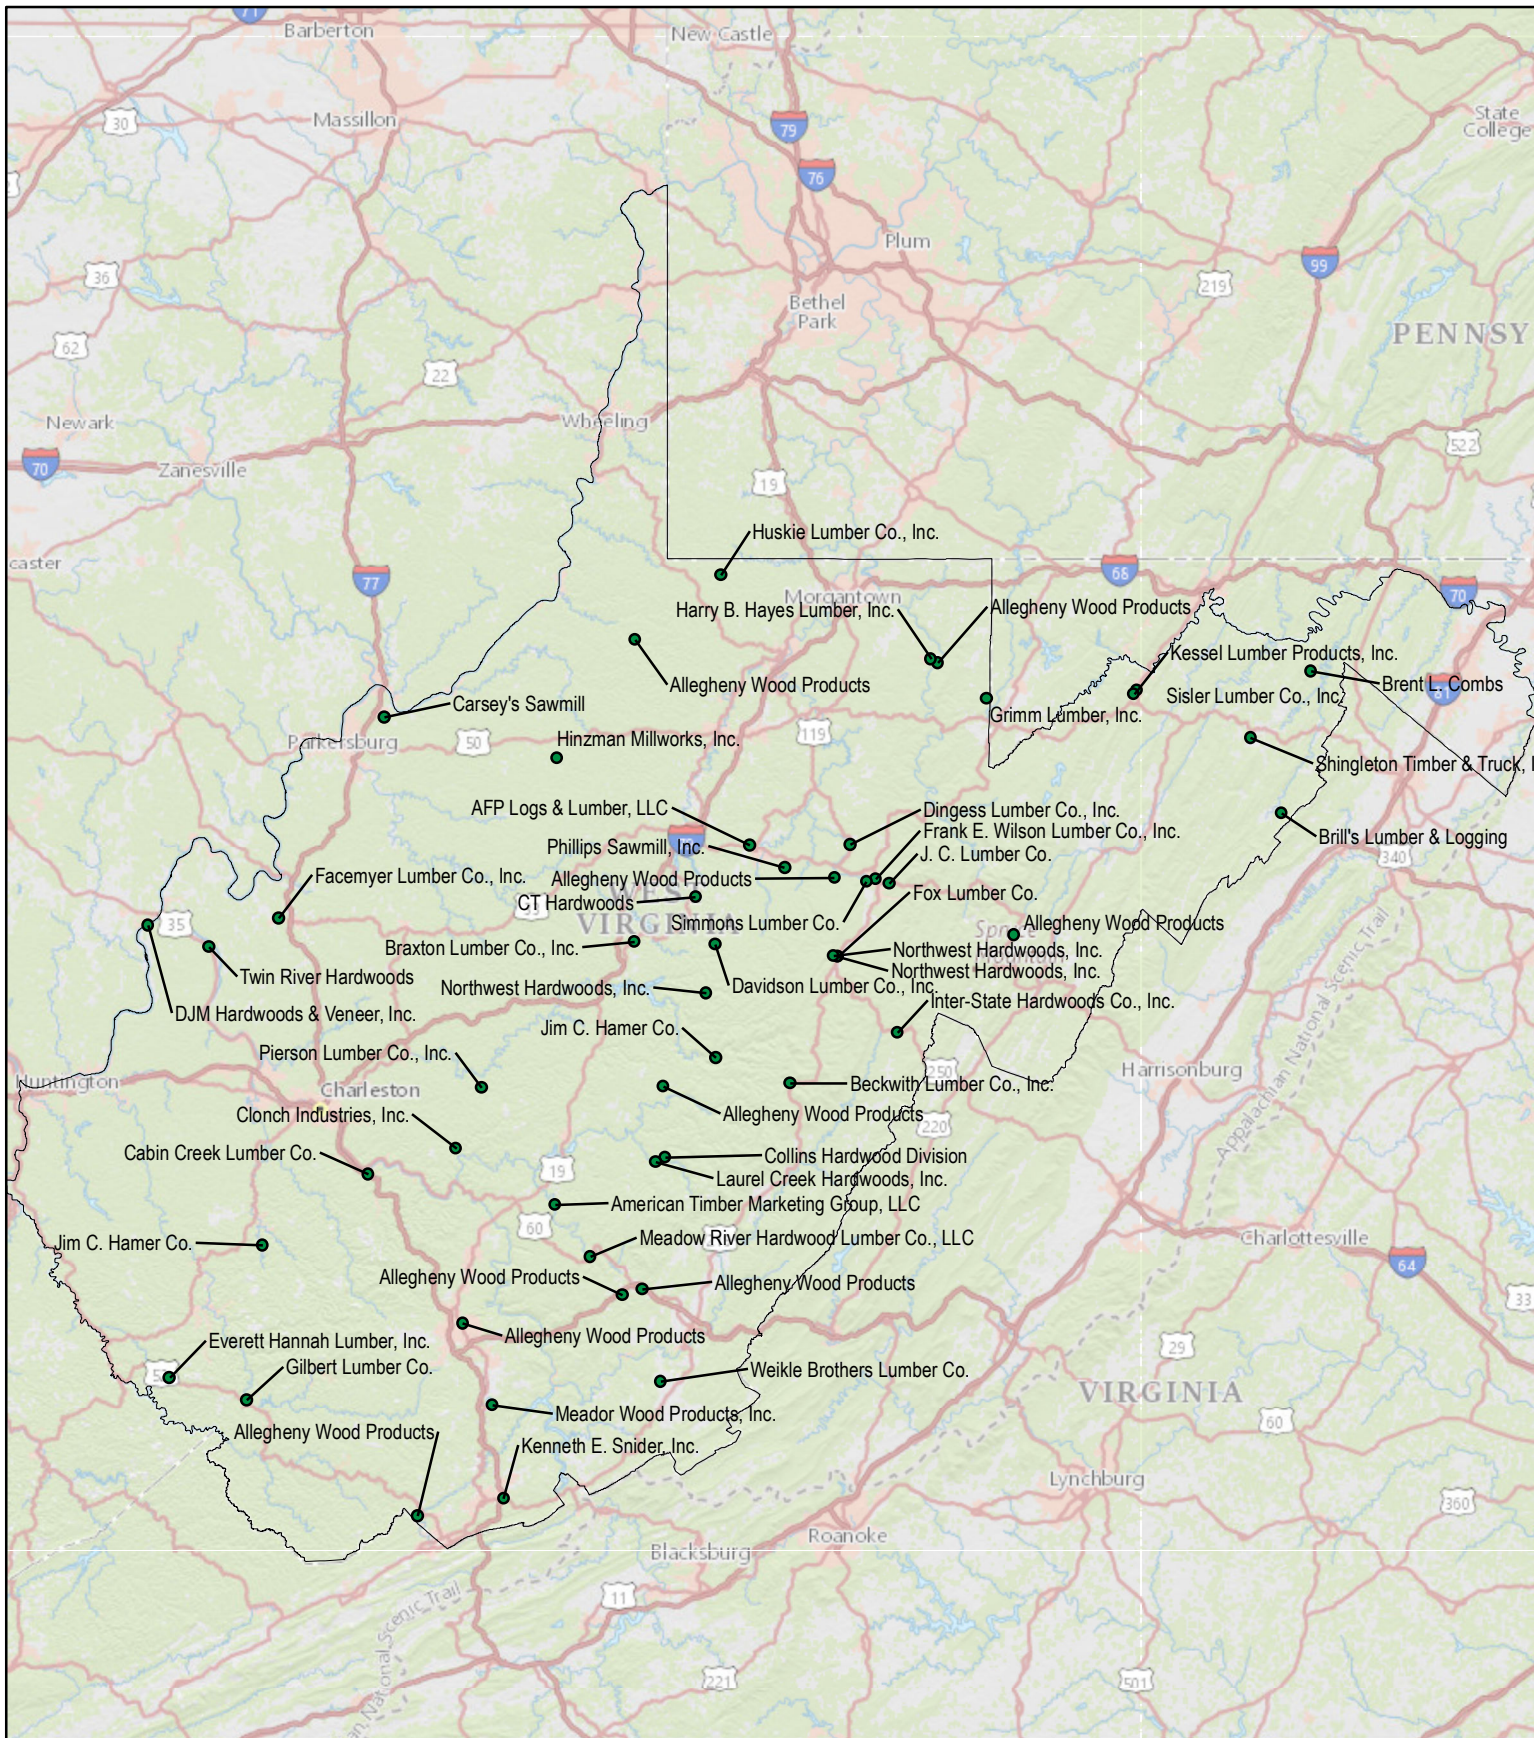

An on-line companion of this directory is maintained by the West Virginia Department of Commerce and West Virginia Division of Forestry. The website can be found at:
(<http://www.wvcommerce.org/directory/forestproducts/default.aspx>)

This website has additional information such as maps, direct links to websites, emails, and further company information.

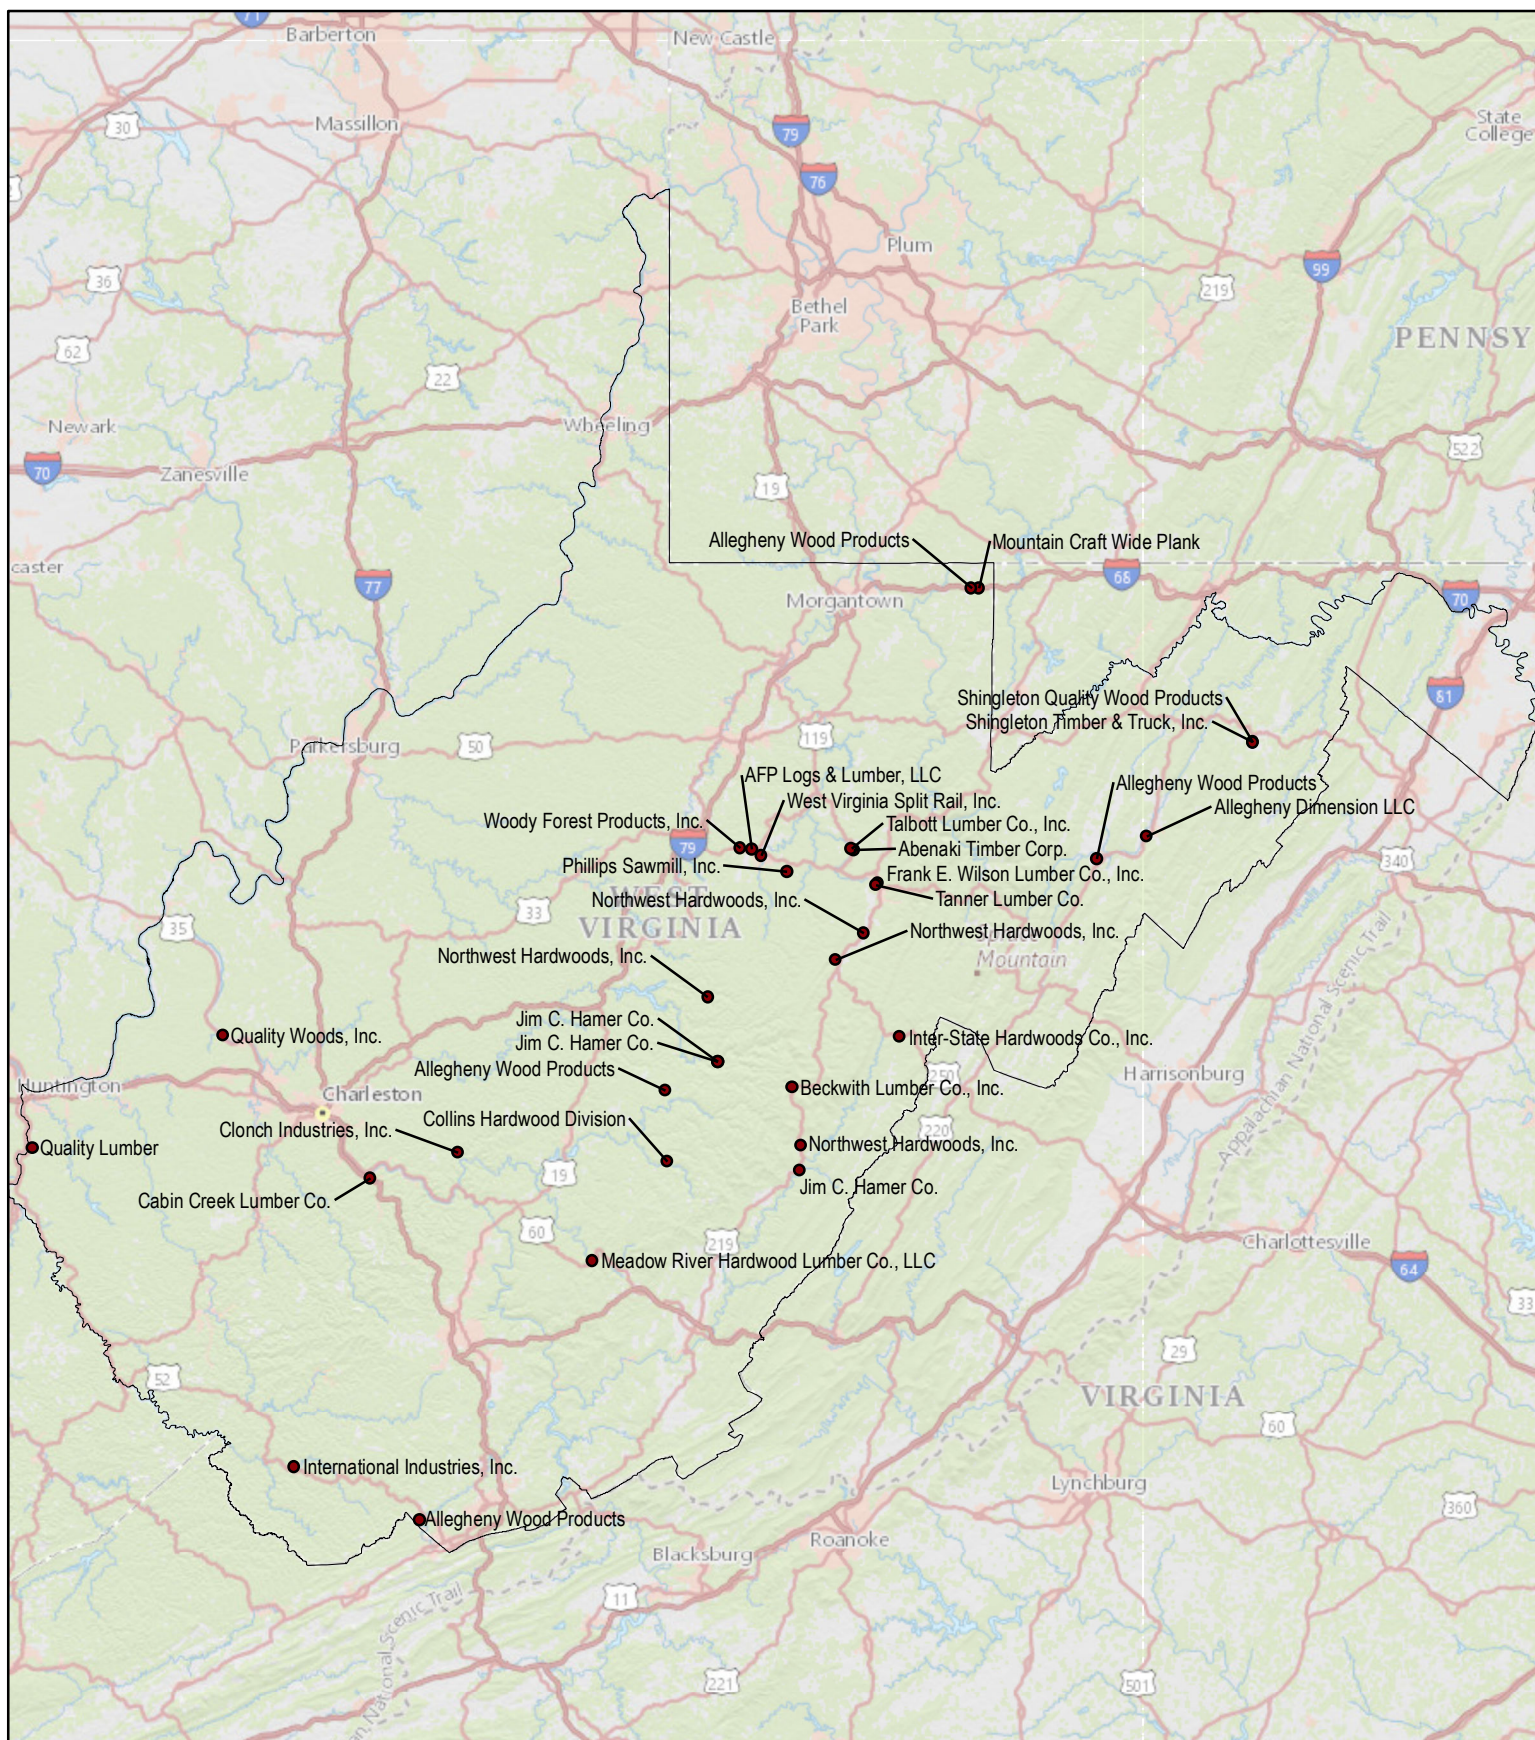

This directory will also be available in electronic form on the Appalachian Hardwood Center website, which can be found at (<http://ahc.wvu.edu>).

To update this edition, input was solicited from regional and county economic development entities and WV Division of Forestry Regional Foresters.

COMMERCIAL

Commercial products are generally produced in large quantities and sold in bulk to other companies for further processing to make other products or sold at the retail level. These products are shipped to regional, national, and international markets. This listing is by categories, in the order that they appear in the yellow columns of previous table, in county order, and alphabetically in the county.
